Welcome

- I'm Zak Zebrowski.
- I'm a Forensic Database Engineer / "Data Miner" / and Perl guy.

Outline

Characteristics of internet connections

Ways of determining web user identity

**Preventing a web user identity from being
determinable from an end user's perspective**

Finish

Why Bother

To determine who visits your website.

Validate you are connecting from a known location versus an unexpected country.

To hide your identity on the internet

Note: Everything in this presentation is old. New technologies and techniques evolve over time which may be more (or less) intrusive.
